WEST JAVA PROMOTION AND
INVESTMENT COORDINATING BOARD

platform for quality growth

BANDUNG, INDONESIA 24-26 OCTOBER 2011

GOVERNOR OF WEST JAVA

The platform for quality growth

Dear Investors,

The backbone of the economy of West Java for the future lies in the sector of WEHAB (Water, Energy, Health, Agriculture and Biodiversity) that materialized in the environmental services, food and agricultural industries, manufacturing industries and others according to market demand. Besides that, West Java has exceptional assets for building education industries with no less than national leverage and reach.

West Java is the best investment destination in Indonesia, for today as well as for many years to come. West Java provides the best opportunity to generate sustainable growth and to yield dependable and healthy returns. My Administration prioritises investment projects

that advantaging from clean geothermal energy resources available with considerable potential in West Java.

Therefore investment planning of West Java take into account the related services sector that support the investors with access to clean water and energy. In the WJIE 2011, We deliver Water, Energy, Health and education, Agriculture and Biodiversity (WEHAB) investments projects package. Those packages constructed of some projects with total investment value of no less than US\$ 10 billion.

The Region of West Java is relatively ahead in the provision of its economic infrastructure, partly due to its geographical position bordering Jakarta as the centre of economy and national government. This infrastructure must be taken care of and its capabilities must be increased so that it will continue to support international competitiveness.

With your presence in the West Java International Exposition 2011, you will be exposed not only to opportunities to make a viable business and industrial cooperation with the world's fourth largest market, but beyond that an opportunity of ensuring your business realm as a sustainable entity in today's and future's global economy. So that, ensure your presence in the venue and seize the opportunity.

THE GOVERNOR OF WEST JAVA

AHMAD HERYAWAN

The venue : In touch with the finest

CONDUCTIVE INVESTMENT

The Administration of West Java Province has taken and continue to take steps to revive many vital preconditions components for investment. In the policy framework, there have been significant endeavors to improve West Java's human equity, ecological support, good governance and infrastructure capacities. Such support capacities are the most fundamental platform on which West Java can always maintains its competitiveness as the "heaven" for investment.

The West Java Province Administration seeks out human advancement with full set of equities. These will enable people to develop their competitiveness level in the future and will be able to extend their access to various forms of investment, including endeavoring to provide quality education that is affordable.

The West Java Province Administration is now endeavoring for a better living environment. As

all economy or industrial activities require water and energy, and even in the services sector, there have been continuous development to safeguard the environment support. This will better ensure long-term viability of investment in the region. The steps taken by West Java in overcoming these issues are also set out in the framework of achieving the target of West Java Agenda of Millennium Development Goals and revival of ecological support capacity in West Java.

Over the past three decades, West Java's economic base has become highly diversified. Today, it is an increasingly more modern economy with vibrant manufacturing and services sectors. Aside from social and infrastructure development, manufacturing accounts for most of the capital investment that has been made in West Java, where almost 40 percent of Indonesia's manufacturing industries are centered.

platform for quality growth

BANDUNG, INDONESIA 24-26 OCTOBER 2011

Robust Growth Projection

Following the success of the 1st West Java International Expo 2009, in the WJIE 2011, in the West Java International Exposition 2011, again we deliver a range of robust growth projects. We deliver opportunities into Water, Energy, Health and education, Agriculture and Biodiversity (WEHAB) investments projects package Those packages constructed of no less than of US\$ 10 billion in value.

Given the robust growth projection of the region, WJIE 2011 is created to bring together investors and managers to discuss strategies on how to access and capitalise on opportunities in the best region of the emerging Indonesian market. Delegates will hear from key players why West Java is the most exciting market in Indonesia, or even in Southeast Asia. As they participate in West Java's investment market, they gain exposure to region and also Indonesia's leading sectors and high growth assets, accessing new opportunities for partnerships and investments.

WJIE Summit 2011 will feature local and international speakers who have successfully launched an investment in Indonesia. Hear success stories and learn best practices from leaders in the following industries: WJIE 2011 is created to bring together investors, regulators and fund managers to discuss strategies on how to access and capitalise on the emerging Indonesian market. Hear success stories and learn best practices from leaders in the following industries: Commodities and natural resources companies, Private equity firms, Infrastructure companies, Wealth Funds, Regulators, and Investment banks.

WJIE 2011 will focus on:

- Infrastructure opportunities in transportation and renewable energy and power
- Manufacturing opportunities, including ocean based food processing
- Regulatory liberalization and tax implications

“West Java is the best investment destination in Indonesia, for today as well as for many years to come. West Java provides the best opportunity to generate sustainable growth and to yield dependable and healthy returns.”

Beef Cattle Industry

PROJECT OBJECTIVES

Beef imports accounted for only 20 percent of national consumption. Whilst livestock supply of the province can only manage 17.5 percent of the market demand. The neighboring Jakarta alone demands around 324.000 heads of beef cattle per year, and growing 13.5 percent annually. The current livestock supply can only manage 14.7 percent of the market demand.

The objective of the project is to improve and expand West Java Cattle Breeding, Farming and Meat production capacity and capability to meet both regional and national demand for sustainable beef supply.

Breeding Industry and Husbandry Industry

The locus of investment concern for Beef cattle development in West Java will be concentrated in Southern area in Ciamis, Tasikmalaya, Garut, Cianjur, and Sukabumi Regencies.

The ecosystem carrying capacity of beef cattle farming in Southern region of West Java alone is 2.9 million Animal Units.

There are public and private slaughter facilities operating. Four slaughter plants in Bandung, and two are private and two are operated by the government. The locus for Slaughterhouse industry will be directed to the areas that provide easy logistical access to the supply chain. The locuses are Cirebon Regency, Bandung Regency, Purwakarta Regency, Ciamis City, and Sukabumi City. (see map below)

Financial Support for Cattle Breeders

Subsidize bank loans to cattle breeders. With loan support, domestic cattle breeders are expected to expand national cattle stocks to increase beef production, reduce the country's dependence on imports, and breeders will be able to obtain subsidized loans to finance the imports of high-quality sperm and breeding stock.

Under the loan scheme, domestic breeders are expected to expand the national herd with the goal of producing about 200,000 additional animals per year, and to have at least 800,000 additional head of cattle by 2014.

Integrated Agro and Tourism

PT. PERKEBUNAN NUSANTARA (PTPN) VIII

PT. Perkebunan Nusantara (PTPN) VIII is one of the state-owned plantations. The business scope including cultivating plants, processing, and selling plantation commodity such as tea, rubber, and palm as the main commodity, and also quinine and cocoa. PTPN VIII managing 41 plantations and 1 hospital. The plantations are spread in 11 districts/cities all around West Java (Sukabumi, Bogor, Cianjur, Bandung District, West Bandung District, Bandung City, Garut, Tasikmalaya, Purwakarta, Subang, and Ciamis) and 2 districts in Banten Province (Lebak and Pandeglang).

PROJECT OBJECTIVES

The estates managed by PTPN VIII are allowed to be developed as tourism areas. To perform these activities PTPN VIII realizes the need to conduct cooperation with experienced strategic partners and experts in the field

Amon others, two of the plantations managed by PTPN VIII are The Estate of Panglejar and The Estate of Cikumpay that topographically positioned at 400 sd 600 m above sea level with monoculture vegetation, unique, beautiful and distinctive from its surrounding. Daily temperature ranges in 20 - 25 C.

THE INVESTMENT PLAN

The Development of Integrated Agro-industry and Tourism Development. Area secured for these purposes is 2995.63 ha with plantation activities of tea and rubber, consisting of four locations, Gunung Hejo 600,58 ha; Gunung Susuru 352,50 ha and Panglejar 939,80 ha; Maswati 1.102,75 ha. The Nusantara VII corporation outlining the plan to arrange the areas to become an agrotourism spots. The areas development aims to bringing ecological benefits - conservation and maintenance of ecological and biodiversity integrity.

Welcoming Strategic Partner

To develop the abovementioned assets, PTPN VIII has outlined a range of beneficial partnership schemes that maximize mutual beneficials value and strong business equity.

Come to **WJIE Summit 2011** and find:

- the best growth sectors of West Java and establish partnerships in accessing market opportunities
- some infrastructure projects that offer lucrative value propositions
- the world's best and most needed commodities and natural resources abundant in West Java.

Participants and Delegates

WJIE 2011 is an exclusive event for investment focused executives from leading corporations across the globe. Attendance includes keynote and case study presentations, one-to-one business meetings, accommodation and meals, plus an opportunity to relax and enjoy the splendid entertainment provided. WJIE's participants and delegation among others:

- Chief Executive Officers National and International Financial, Industry and Trade
- Chief Executive Officers Indonesia State Owned Enterprises
- Chief Investment Officers and or Representative of International Development Agencies
- Ministers, Director Generals and Directors of related sectors and Regional Policy Makers
- National dan International Mass Media/Journalist Nasional
- Academics and Opinion Leaders
- National/Regional Stakeholders
- General Public with investment interest

INDONESIA: the Southeast Asia Powerhouse

Already among the top 20 economies in the world in terms of GDP, the Indonesian economy grew at more than 6 % in 2010, making it one of only a handful of major economies to grow through the "Great Recession." With its abundant natural resources, Indonesia has recently also benefited tremendously from the world commodities boom.

Indonesian President SBY's ambitious plans for Indonesia over the next five years include pledges to boost economic growth to 7% by 2014, reduce the poverty level to 8%, and decrease unemployment to 5%. The government believes that a stable administration, lower capital costs and a government plan to spend as much as \$34 billion to build roads, ports and power plants by 2017 will combine to almost double Indonesia's \$433-billion economy in the next five years to \$800 billion. These are big goals. Indonesia last experienced a 7% growth rate in 1996, just prior to the 1997-98 Asian financial crisis.

Indonesia enacted sound fiscal and monetary policies and worked successfully to reduce its government debt-to-GDP ratio. Since 1999, government debt as a percentage of GDP has declined to less than 30%.

Indonesia's is the top performers in the global stock market stakes. Indonesia's Jakarta Composite Index has outperformed the benchmarks of the world's stock centers. By index hitting an all-time high in recent days, the Van Eck's Market Vectors Indonesia ETF (IDX) has more than doubled since its launch -- far outpacing the U.S. S&P 500 (GSPC), and outperforming Brazil. It's also been the single-best performer in 2010.

Indonesia is the fourth-most populous country in the world after China, India, and the United States. Goldman Sachs anointed that over the coming decades, Indonesia investment opportunities is set to increase and its economy will dominate the landscape of the global economy. Indonesia will be the fifth "BRIC".

BENEFICIAL PROGRAMMES

Projects Exposition

During the event of WJIE 2011, no less than 112 investment proposals with accumulated value of US\$ 13.4 billion will be delivered in the venue. These comprises investment opportunity from Central and Regional Government as well as from National and Private Enterprises.

Sustainable Investment Seminars

In order to provide the delegates with knowledge and understanding on the investment support capacity, regulations, procedures and facilitations in Indonesia, several major seminars will be conducted. The seminars are as follow;

- West Java Investment Outlook 2025
- West Java Energy and Water Supply towards 2025
- Up date on National Investment Regulation
- Up Date on Indonesia Custom and Taxes Regulation
- Special Economic Zone, Transportation and Logistic

Business Meeting

Business meetings can be pre-arranged between the Delegates and the participating investment sectors. To ensure maximum benefit is gained from these meetings, the attendees are given a personal password into our secured website in order to review the participating investment sectors and delegates and make informed choices of whom to meet with at the event.

One to One

To ensure maximum beneficial objective for the delegates and effective business communication among the participants one-to-one business meetings are make possible during the event. The organizing committee provides the participants and delegate with in venue business challets to be utilize with full privacy and provide free refreshment for the pupose. Prior arrangement for the use of the facilities are necessary.

Geothermal Power Plants

INVESTMENT COST: Total investment required for the 14 geothermal plants is US\$.

PROJECT LOCATION: As per indicated in the map

PROJECT OBJECTIVES. Geothermal potentials of West Java have been inventoried in 43 areas, spreading in 11 districts with a total geothermal energy potential of 6,101 Mwe, divided into 2,184 Mwe of resource and 3,237 Mwe of reserve.

The geothermal potentials realized are only approximately 705 MW, utilized for generating electricity, 1,150 MW are not yet produced, and the remaining 3,456 MW are not explored.

The utilization of geothermal will contribute to national energy resilience and to West Java Global participation in the global clean development mechanism. West Java promotes immediate investment inflow for the development of clean energy.

The geothermal potentials should be explored, given the fact that today energy source supply growth is unbalance with energy consumption demand. The development of Geothermal Power Plant in West Java is projected to fill the current disparity in electricity supply by 2015.

PROJECT DESCRIPTION. The Development and Operational Management of 14 geothermal power sites with total installed capacity 60 MW.

INVESTMENT OPTIONS

- Bidding process for Geothermal Working Area (GWA):
- Open bidding in two phases
- Winner gets Geothermal License for 35 years
- Preliminary Survey Assignment for Open Areas :
- Direct Investment to finance exploration
- First right refusal for the Assignee
- Awarded compensation if Assignee not win the bidding.
- Business Cooperation with Existing License Holder :
- drilling, infrastructure, power plant EPC, finance, carbon redit/CDM, etc.

INCENTIVES

- National Policy support (Geothermal Road Map 2025)
- Carbon credit (Clean Development Mechanism)
- Fiscal Incentives (free imported tax for exploration equipment. Etc)
- Support for processing permit and other incentives from Local Government.

Southern Ocean Integrated Fishery Industry

INVESTMENT COST: The Government of West Java Province estimates that the capital requirement for the modernization and or construction of these two fishery ports is US\$ 40-55 million.

PROJECT LOCATION: Ciamis Regency and Sukabumi Regency

PROJECT OBJECTIVES. As part of fishery industries development, the West Java Provincial Government has lay-outed the plan to:

- Modernize the existing fishery ports.
- Modernize the existing fishing fleets.
- Modernize the ocean based food processes that encompass standardization, technological capacity, hygienic, and management.

The fishery ports will be developed based on the fishing allocation zones, catchment capacity, the presence of hub into supply chain, fish processing industries and other resources that will be made available in the location.

PROJECT DESCRIPTION. The requirement specification for the respective ports to be developed in the locus are, port carrying capacity to accommodate fishery ships up to 200 GT with handling capacity to manage minimum 30-60 tons per days.

SCOPE OF THE PROJECT: Among others, basic infrastructure required for the fishing port are:

- PORT
- Fuel facility
- Auction or market facility
- Processing and handling facility
- Packing and storing facility
- Medical facility
- Laboratory and/or quality control facility
- Fishermen's meeting room
- Surface of land area
- Waste installation

For the Sukabumi Port, the Government of West Java Province has also a plan to construct berth that can accommodate 3000 DWT ship. The government also regulate and provide parameters for ports development. Some of the parameters are: port function to the national logistic plan, including its connection to the supply chain and its access to agro-marine processing industries.

The Sukabumi modern fishery center is expected to be fully in operation by early 2015 and the Ciamis modern fishery center by the end of 2016.

Advance Nursing Education Center

INVESTMENT COST: Preliminary calculation on some major components was figured US\$ 17 million

PROJECT LOCATION: Spatially planned in the Regency of Bandung Barat.

PROJECT OBJECTIVES West Java Administration is looking forward for the establishment of an advance nursing education center in the region. The Center should be able to provide undergraduate, graduate and post graduate education and practises in nursing specialties. West Java is gearing toward a better quality of nursing services in the region.

The Center should be able to provide undergraduate, graduate and post graduate education and practises in nursing specialties and should also be able to serve as a professional training hub for undergraduate nursing education.

The required nursing specialties are extensive, among other: Management of Central Operating theatre; Management of Intensive Care Unit; Pre Hospital Ambulance Service; Post Basic Operating Theatre; Orthopedic; Cardiothoracic; Neurosurgical Intensive Care; Maternity; and Pediatric Intensive Care Nursing

Master of Science in Nursing. This graduate-level degree may focus in one or more of many different advanced nursing specialties such as acute care, adult, family, geriatrics, neonatal, palliative care, pediatric, psychiatric, women's health, etc. It is also a prerequisite for doctorate-level nursing education. This will include Master of Science in Nursing (MSN) is an advanced-level quaternary education degree for Registered Nurses. It is required to become an advanced practice nurse, Clinical Nurse Specialist, Nurse anesthetist, Nurse Midwife, Health Policy expert, or a Clinical nurse leader.

Doctor of Nursing Practice (DNP or DrNP). The Doctor of Nursing Practice (DNP or DrNP) is an advanced-level practice degree that focuses on the clinical aspects of nursing. The curriculum to generally includes advanced practice, leadership, and application of clinical research. The DNP is intended primarily to prepare registered nurses (RN) to become advance practice nurses. This include the nurse practitioner (NP), certified registered nurse anesthetist (CRNA), certified nurse midwife (CNM), or clinical nurse specialist (CNS).

SCOPE OF PROJECT: The scope for the development Advance Nursing Education Center include, among other: Curricula Development; Resources Accounting/Assesment; Master Plan for Advance Nursing Education Infrastructure; Design Engineering; Construction and Development, and Operational of the Center.

Integrated Waste Recycle Plant

INVESTMENT COST: Provision of expertises and financial assistances necessary for the planning of West Java Regional Integrated Recycle Plant.

PROJECT LOCATION: Spatially planned to serve the West Java Metropolitan Areas dan West Java North Coast Areas. Bandung City, Bandung Regency; Bekasi Regency, Karawang Regency, Subang regency and Indramayu Regency.

PROJECT OBJECTIVES The challenges of waste management issue should be immediately answered by West Java Province. To make optimum benefits out of the methane gas capture in the waste organic treatment in the form of electrical power generated. The recovered methane is flared off, producing the less powerful greenhouse gas, carbon dioxide.

Using the number of populations in the region, total organic waste production in 2009 was around 78,518 tons in actual. This comprise of 53,000 tons per day for organic and 25,781 tons for the non organic waste.

The project will be develop to achieve environmental sound and sustainable regional integrated waste treatment and final disposal system, that capable to manage the need of West Java Metropolitan Areas dan West Java North Coast Areas.

PROJECT SCALE: Bandung City, Cimahi City, Bandung Regency, West Bandung Regency and all Regencies and City at the northern coast of West Java.

Assumptions were used to measure the collectability of the organic and non organic waste. The collectible organic waste is measured to as low as 16,848 tons and 1,640 tons for the non organic per day. Such daily figure will construct 505,439 tons per month and 6,150.000 tons per year of organic waste. West Java alone will produce collectible around 2,879,565 tons organic waste.

Further study and measurement are required to calculated the collectible volume of waste for the respective kinds. As it come to completion the complex should be able to sustainably serve and manage organics waste management with total loading capacity of 6,150,000 tons annually and the rising figure for the next 20 years. This figure include organic waste from the Province of DKI Jakarta.

SCOPE OF THE PROJECT: The scope of this Integrated Regional Recycling Project are preliminarily defined as: Design, Technological and Engineering Assesment; Management and Logistical Assesment; Operational Management Plan; Waste Mobility system; and Recycling Plant Infrastructure Construction

Delegate Benefits

Individual pre-arranged meetings with senior representatives of sponsor companies based on requests by the Delegates. Keynotes, conference presentations, workshops and seminar sessions designed to meet Delegates needs, led by world-class industry experts and pioneers

All conference materials, accommodation, meals and leisure activities for the duration of the event. An opportunity to relax and enjoy the venue.

The Regional Government of West Java is striving to implement a new development paradigm to fulfil the future demands and challenges of global competition. The virtues of good governance, accountability, transparency, democracy and participation should be part of the merits of the province's development process.

West Java has been a capable investment destination in Indonesia and is today the first the choice for investors, both domestically and globally. This makes West Java as the home base for no less than 20 percent of Indonesia's export value.

Services Provider

Service Provider for participants and delegations of WJIE 2011 re available in the venue, they will provide you with the necessary facilities free from the distracting paraphernalia of a traditional exhibition hall. During the event the organizing committee will also provide the participants and delegate with free consultations regarding regulations, taxation, investment permit procedures and others aspect related to smooth your investment interest in West Java.
